Portfolio: github.com/nilesh14k | play.google.com/u.s.

Room no: 2.6, 11 Springfield Mount, Postal Code: LS2 9NG, Leeds, United Kingdom

EDUCATION:

- **MSc Data Science and Analytics**, University of Leeds 2022-2023
  (Currently Enrolled)

- **Bachelor of Computer Application**, I.K. Gujral Punjab Technical University 2019-2022
  Grade: 8.51/10.00 CGPA

RELEVANT SKILLS:

Statistics, Python, R, C, C++, SQL, LINUX, Artificial Intelligence, Machine Learning, Deep Learning, Data Warehouse, Data Mining, Text Analytics, Data Structure and Algorithm, Computer System Architecture, Android Development (Java, XML, Firebase,), Web Development (JavaScript, HTML, CSS).

INTERNSHIPS:

- **Intern** at Sprouting Wings (Jaipur, India) **May 2021 - November 2021**
  Developed an android app that can track a user's fitness. Built this application on my own under the supervision of my mentor. This app was built to test user experience and collect data using Google Analytics, for the company.
  I worked with Java, XML, Firebase Services: analytics, real-time database, crashlytics, notifications, authentication, Google Maps API, Razor pay, Android Studio IDE.

INDEPENDENT PROJECTS:

- **BPBO System** **August 2021 - October 2021**
  Designed & Developed a web application. It is built behind a reason and that is the covid-19 pandemic caused a shortage of plasma supply in India. This project was a team project consisting of 4 members.
  My team build this application using JavaScript, HTML, CSS, SQL, Visual Studio Code. I worked with database creation, connection using SQL and also worked on the backend using JavaScript.
- **Uni-Switch:** **August 2021 - September 2021**
  Using this app, one can control or turn on-off any electronic device from anywhere in the world using the android app with the help of the internet. The app is integrated with Arduino modules to function seamlessly. I used Android Studio IDE, Java, C++, XML, Arduino uno.
- **Autobot:** **May 2021 - June 2021**
  With the help of this app, one can join Microsoft teams meeting on time, without delay. The user has to run this app, and it will keep running in the background and keep checking one's upcoming meeting on teams. When the meeting time arrives it automatically rings an alarm and redirects you to the meeting joining page. I used Python 3.8, Selenium, Twilio.
- **Parking Record Manager:** **February 2021- March 2021**
  This app can detect the car and take a photograph of the car that entered the parking lot, to make a data record of parked vehicles. It also detects the number plate and writes down the plate number in records. I used Python 3.8, TensorFlow and OpenCV.

- **Password creator:** **January 2021**
  It creates a password on the basis level selected by the user, i.e., weak/normal/strong. And it can create n numbers of passwords only by using a single word. *n (number of possible passwords), n=$9.3*10^{100}$. I used Android Studio IDE, Java, XML.

- **Parik**क्षा **[Pariksha]:** **June 2020 - January 2021**
  It is a server-based quiz application, the admins can host a quiz and thousands of participants can attempt that quiz. I used Android Studio IDE, Java, XML, Firebase services: authentication, Real-Time database, Notifications, Crashlytics.

- **Image to text:** **December 2020**
  It detects text from an image and gives output as text. I used Python 3.6, Pytesseract.

- **Game: Stone Paper Scissors:** **December 2020**
  A game: stone-paper-scissors, in which the computer will respond to the user with voice and graphics. I used Python 3.6, gTTS.

- **Emergency Location Sender[iCare]:** **April 2020**
  Sends location to the selected contacts after detecting an accident using sensors on the vehicle and sends a short video recording. It can send location even without the internet. I used Android Studio IDE, Java, C++, XML, Maps API, Arduino Uno, Pressure plate.

TECHNICAL CERTIFICATIONS:

- The Comprehensive Android App Development Masterclass, **January 2021**
- Foundations of Project Management, **October 2021**
- 100 Days of Code: The Complete Python Pro Bootcamp, **December 2021**
- Machine Learning A-Z™: Hands-On Python & R In Data Science, **September 2022**

ACTIVITIES AND AWARDS:

- **December 2021 – March 2022**
  Transition Readiness - Academic Support Volunteer, Make a Difference (NGO).

- **October 2020 – July 2022**
  Campus Icon, Hackoverflow Technical Society, Chandigarh University

- **April 2020**
  Developed a Car crash informant system integrated with pressure plates, Arduino and a custom mobile application by the name of *iCare*, Hackoverflow 3.0, Chandigarh University,.

- **February 2020**
  Developed an agricultural stock management system, Smart India Hackathon- Software Edition, the Ministry of Human Resources Development and AICTE- All India Council for Technical Education, Government of India.
